19-2 Viruses (p478-483)

1 Viruses that contain RNA as their genetic information are known as

- a. prions.
- b. oncoviruses.
- c. retroviruses.
- d. bacteriophage.

19-2 Section QUIZ

1 Viruses that contain RNA as their genetic information are known as

- a. prions.
- b. oncoviruses.
- c. retroviruses.
- d. bacteriophage.

2 The first type of virus to be studied was the

- a. bacteriophage.
- b. tobacco mosaic virus.
- c. influenza virus.
- d. AIDS virus.

19-2 Section QUIZ

2 The first type of virus to be studied was the

a. bacteriophage.

b. tobacco mosaic virus.

c. influenza virus.

d. AIDS virus.

3 Which of the following statements about viruses is true?

- a. Viruses appear similar to bacteria when studied with a light microscope.
- b. Viruses display the essential characteristics of living things.
- c. Viruses can reproduce independently if they contain DNA.
- d. Viruses cannot reproduce unless they infect a living cell.

- 3** Which of the following statements about viruses is true?
- a. Viruses appear similar to bacteria when studied with a light microscope.
 - b. Viruses display the essential characteristics of living things.
 - c. Viruses can reproduce independently if they contain DNA.
 - d. Viruses cannot reproduce unless they infect a living cell.

- 4 A virus integrates its DNA into the DNA of the host cell but remains inactive for a while in
- a. a lytic infection.
 - b. a lysogenic infection.
 - c. neither a lytic nor a lysogenic infection.
 - d. retroviral infection.

- 4 A virus integrates its DNA into the DNA of the host cell but remains inactive for a while in
- a. a lytic infection.
 - b. a lysogenic infection.
 - c. neither a lytic nor a lysogenic infection.
 - d. retroviral infection.

- 5** Retroviruses are considered unique because
- a. they have RNA in their capsid and not DNA.
 - b. they have DNA in their capsid and not RNA.
 - c. after infection of a host cell, their RNA makes DNA.
 - d. after infection of a host cell, their DNA makes RNA.

- 5 Retroviruses are considered unique because
- a. they have RNA in their capsid and not DNA.
 - b. they have DNA in their capsid and not RNA.
 - c. after infection of a host cell, their RNA makes DNA.
 - d. after infection of a host cell, their DNA makes RNA.
