20-1 The Kingdom Protista

20-1 Section QUIZ

- 1** A protist is any organism that is not a plant, an animal, a fungus, or a prokaryote.
- a. True
 - b. False

20-1 Section QUIZ

1 A protist is any organism that is not a plant, an animal, a fungus, or a prokaryote.

A a. True

b. False

20-1 Section QUIZ

- 2 Funguslike protists are
- a. autotrophic.
 - b. photosynthetic.
 - c. parasitic.
 - d. chemosynthetic.

20-1 Section QUIZ

2 Funguslike protists are

- a. autotrophic.
- b. photosynthetic.

A c. parasitic.

- d. chemosynthetic.

20-1 Section QUIZ

- 3 Animal-like protists are
- a. autotrophs.
 - b. heterotrophs.
 - c. decomposers.
 - d. producers.

20-1 Section QUIZ

3 Animal-like protists are

a. autotrophs.

A b. heterotrophs.

c. decomposers.

d. producers.

20-1 Section QUIZ

- 4 Biologists have difficulties classifying protists because
- their DNA cannot be examined.
 - evidence suggests that they evolved from so many different groups.
 - structural similarities used for classification are difficult to detect.
 - their ancestors may have evolved through symbiosis.

20-1 Section QUIZ

- 4 Biologists have difficulties classifying protists because
- a. their DNA cannot be examined.
 - A b. evidence suggests that they evolved from so many different groups.
 - c. structural similarities used for classification are difficult to detect.
 - d. their ancestors may have evolved through symbiosis.

20-1 Section QUIZ

- 5** An organism is classified as a protist if it
- resembles any other member of the Eukarya domain.
 - shares DNA sequences that are found only in other protists.
 - has a cell wall made of cellulose.
 - does not belong in any other kingdom of the Eukarya.

20-1 Section QUIZ

- 5** An organism is classified as a protist if it
- a. resembles any other member of the Eukarya domain.
 - b. shares DNA sequences that are found only in other protists.
 - c. has a cell wall made of cellulose.
 - A** d. does not belong in any other kingdom of the Eukarya.
